PROJECT OVERVIEW

About

- Interactive visual burger customization interface for real-time order personalization.
- Data-driven recommendations based on customer preferences and ordering history.

Goals

With Burger Bliss, we're making it easy for burger lovers to create their perfect meal with cool customization and smart suggestions, aiming to be their favorite choice for a tasty, convenient experience.

Users

- Tech-Savvy Consumers
- Busy Professionals
- Trend Followers

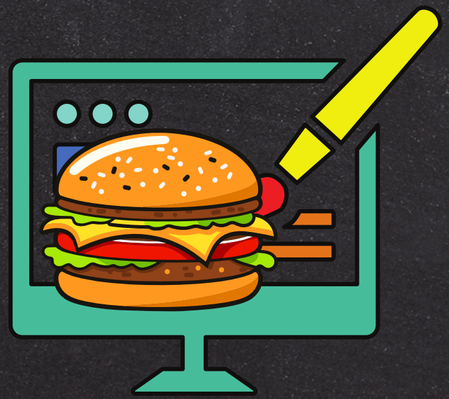

KEY FEATURES OF THE PROJECT

ONLINE ECOMMERCE SYSTEM

A fully Functional Online Ecommerce system with all the necessary features

- User Authentication
- Online Payment Gateway
- Online ordering of food

CUSTOMIZABLE BURGERS

Users can customize their order and visually see the customization

DATA-DRIVEN RECOMMENDATION

Based on previous orders, the website will recommend the popular items in the restaurant

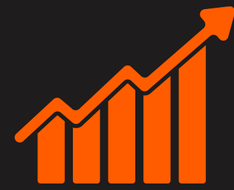

MOTIVATION BEHIND THE PROJECT

Enhancing Customer Satisfaction

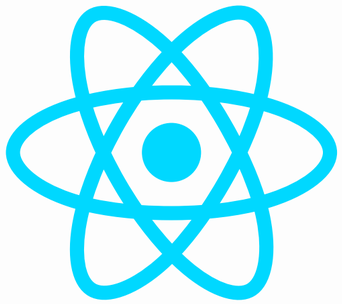

Bringing Innovation in the food industry

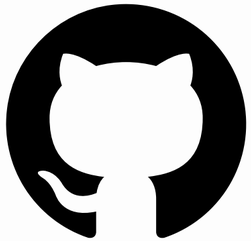

Boost Sales and Growth
