Anika Ibnat

Age 24 years	**Location** H 70, R 11, S 13, Uttara, Dhaka
Occupation Medical Student	**Family** Parents,siblings

> “I want to become healthier, but I need a simple plan that fits into my study schedule.”

About

A medical student who spends much of her day attending classes and studying . She wants to become healthier and lose some weight, but never followed a proper exercise routine. She needs a fitness tracker that provides simple guidance, encouragement and achievable daily targets.

Goals & Needs

1. Build a regular exercise habit.
2. Track daily steps and physical activity.
3. Follow beginner-friendly home workouts.
4. Monitor calories burned.
5. Receive reminders to exercise and drink water.
6. View simple weekly progress reports.
7. Stay motivated through achievable goals.

Motivations

Anika wants to feel more energetic, improve her confidence and develop a healthier lifestyle as a med student. Small achievements, daily streaks and encouraging messages motivate her to continue exercising.

Everyday Activities

1. Attends medical classes.
2. Studies for several hours every day.
3. Uses public transportation.
4. Spends time on social media.
5. Occasionally walks with friends.
6. Prefers short workouts at home.

Frustrations

- Finds complex fitness applications confusing.
- Has difficulty maintaining a regular routine.
- Frequently forgets to exercise.
- Cannot afford an expensive gym membership.
- Becomes discouraged when results are slow.
- Does not understand complicated fitness statistics.
- Loses motivation very easily and gives up.

Device Usage

- Desktop
- Social Media
- Mobile

User Story 1
As a beginner, I want to receive simple daily step and exercise goals so that I can gradually build a habit and a healthy routine.

SABRINA ISLAM, 180042122

User Story 2
As a busy student, I want to receive workout reminders so that I do not forget to take care of my health while studying.

Fitness tracker app

Ridwan Ahmed

Age 38 years	**Location** H 70, R 11, Mirpur, Dhaka
Occupation Software Engineer	**Family** Wife, two children

> “I need a fitness routine that works around my job and does not take hours every day.”

About

A software engineer who spends approximately eight to ten hours sitting in front of a computer. Due to his busy schedule, he struggles to exercise regularly. He wants an app that can remind him to move, provide short workout plans and help him manage his weight and overall health.

Goals & Needs

1. Reduce prolonged sitting.
2. Maintain a healthy body weight.
3. Complete short workouts during busy days.
4. Track steps, calories and active minutes.
5. Monitor sleep duration.
6. Set weekly fitness goals.
7. Receive a clear summary of his progress.

Motivations

Ridwan wants to remain healthy for his family, reduce stress and prevent health problems associated with prolonged sitting. He is motivated by visible progress reports, reminders and short activities that fit into his workday.

Everyday Activities

1. Works at a desk for long periods.
2. Attends online and in-person meetings.
3. Commutes to the office.
4. Spends evenings with his family.
5. Walks occasionally after dinner.
6. Exercises mainly during weekends.

Frustrations

- Has very limited time for exercise.
- Often forgets to take breaks from work.
- Finds long workout plans unrealistic.
- Experiences back discomfort from prolonged sitting.
- Has difficulty measuring his weekly progress.
- Loses motivation when work becomes stressful.

Device Usage

- Desktop
- Social Media
- Mobile

User Story 1
As a software professional, I want to receive inactivity reminders so that I can take regular movement breaks during work.

SABRINA ISLAM, 180042122

User Story 2
As a busy employee, I want to access short personalised workouts so that I can exercise without disrupting my work and family schedule.

Fitness tracker app

Labibah Hoque

Age 28 years	**Location** H 70, R 11, S 13, Uttara, Dhaka
Occupation Marketing Executive	**Family** Parents

> “I want accurate performance data so that I can improve every week and achieve new records.”

About

An active fitness enthusiast who regularly runs, attends the gym and participates in local running events. She already follows a structured fitness routine and uses a smartwatch. She needs detailed performance information, goal comparison and wearable integration to improve her training.

Goals & Needs

1. Track running distance, pace and duration.
2. Monitor heart rate during workouts.
3. Analyse weekly and monthly performance.
4. Set personal fitness targets.
5. Compare current results with previous records.
6. Connect the application with her smartwatch.
7. Track workout intensity and recovery.

Motivations

Labibah is motivated by personal records, performance improvement and challenging fitness goals. Progress charts, achievement badges and detailed statistics encourage her to train consistently.

Everyday Activities

1. Runs three or four times per week.
2. Attends the gym regularly.
3. Plans workouts in advance.
4. Tracks meals and water intake.
5. Participates in fitness communities.
6. Reviews workout statistics after every session.

Frustrations

- Dislikes inaccurate distance or calorie calculations.
- Finds basic fitness reports too limited.
- Becomes frustrated when wearable data does not synchronise.
- Has difficulty comparing multiple workout sessions.
- Does not want to enter activity data manually.
- Needs better information about recovery and performance.

Device Usage

- Desktop
- Social Media
- Mobile

User Story 1
As a regular runner, I want to track my distance, pace, heart rate and route so that I can analyze and improve my running performance.
