A working professional opens the app primarily to answer:
What do I need to do today?
So "Today at a Glance" needs to appear immediately instead of advertisements and warning banners.

Removed decorative emojis from the greeting to create a cleaner and more professional interface.

Removed the large overdue warning because overdue information is already available in the summary cards.

Moved Quick Actions upward because working professionals frequently need to add tasks, notes, or meetings quickly.

Placed the schedule after Quick Actions so the user can quickly review upcoming meetings after checking their workload.
Removed decorative icons from lists because list names already communicate their purpose, reducing unnecessary visual elements.
Replaced the multiple bright colors and gradients with a limited professional palette to reduce visual clutter and improve consistency.
